

Area Construction Manager - Earthworks

Wood is seeking a Construction Area Manager (Earthworks) for our Mining & Minerals project site located near Gogama, Ontario. Reporting to the Manager, Construction, the successful candidate will be responsible for the safe and effective completion of various multi-discipline scopes within the project, primarily on the plant site.

Key Responsibilities

- Work with the engineering team and provide constructibility guidance during the planning phase of the project
- Construction planning and construction work packaging for scopes of work that fall within the Earthworks area of responsibility
 - Build the plan, communicate planning through to engineering teams, align engineering to support construction schedule and execute in accordance with plan
- Major proponent of this position will be to manage up to 4 major civil earthwork, buried services and open pit mining packages from engineering through to completion and commissioning
- Field management of multiple contractors as the project moves to site
 - This will include monitoring of contractor performance insuring compliance with all project objectives - HSSE, Cost, Schedule, and Quality
 - Report against progress of their portion of the overall project schedule.
- Manage a team of multi-disciplined construction coordinators and project engineers while managing multiple contractors in

order to enable on time completion of their scopes of work

- Develop team relationships to ensure smooth interaction between parties responsible for work identification, planning & scheduling, resource provision, and execution of work
- Control nonconforming products, services and their subsequent repair, and re-work until corrective actions have been implemented
- Ensure compliance with established safety and environmental programs to execute services with zero harm to people, environment, and plant
- Monitor, participate and lead safety performance of contractors. Implement steps to rectify any trends of deficiencies in performance of the program
- Participate and lead overall safety and environmental programs to drive continuous improvement
- Ensure safety reporting, incidents, and near misses are reported both in a timely and accurate manner in accordance with the standard procedure
- Maintain a thorough and comprehensive record of actions and events. Document and/or obtain necessary detail to provide a clear understanding of particular occurrences and conditions
- All other duties as assigned

Skills / Qualifications

- Minimum of 15 years' experience in multi-discipline scopes of work in a construction supervisory role specifically on heavy industrial civil earthworks and dam building projects
- Experience in Mining Industry is preferred
- Possess a relevant degree or technical diploma or a combination of equivalent in training and combined experience
- Excellent communication and personnel management skills; ability to liaise at all levels with the client
- Proven track record of successful project completion on time and on budget

- Experience with major earthwork, drill & blast, open pit mining, buried utilities required.
- Accommodation for the site works will be construction camp based. Applicants need to be familiar with standard camp accommodation and rules.
- Authorization to lawfully work in Canada without sponsorship from Wood is required
