

Field Piping Engineer

Wood has an opportunity for a Field **Piping Engineer** to work on a gold mine construction site located near Gogama, ON. Reporting to the Office Engineering Manager, this role will be responsible for providing construction support on major EPC/EPCM projects. This is a fly-in/fly-out position with current rotation of 14 x 14 (12 hours per day).

If you have a successful track record and thrive on challenges in a fast-paced environment, this is the opportunity for you.

Key Responsibilities

- Work closely with Mechanical Piping contractors, engineers, technicians, technologists and project site team
- Provide site piping engineering support for utility, site facilities and services, including buried and overland process piping, pumping stations,
- Provide engineering site support for piping (including interface with other services etc.)
- Provide engineering site support for underground utilities (including fire water, potable water, force mains, sanitary sewer for mine and heavy industrial facilities)
- Provide engineering site support for surface run facilities including pipelines
- Coordinate and support home office for design changes

Skills / Qualifications

- Degree in Mechanical Engineering or equivalent Technology Diploma with related mine experience
- Eligible for registration with Professional Engineers of Ontario, PEO
- Minimum 10 years of experience in large-scale construction projects including underground and surface utilities with value greater than \$10M is preferred
- Self-starter and with a willingness to learn and experience
- Strong communication skills (written, verbal, and interpersonal)
- Ability to produce drawings using CAD software (predominately in AutoCAD) would be an advantage
- Experience with 3D design/drafting software would be an advantage
- Experience in Mineral Mining projects will be an advantage
- Authorization to work in Canada lawfully without sponsorship from Wood is required
