

Mechanical Construction Coordinator

Wood is seeking a **Mechanical Construction Coordinator** to join our project site near Gogama, ON. The successful candidate will liaise with the construction management team, home office engineering support, client and contractor personnel in order to successfully support the construction stage of the project.

This position is fly-in/fly-out, with a 14 x 14 (12 hr per day) rotation.

Responsibilities

- At the planning phase, participate in all levels of engineering M & P reviews. Recognize and promptly address design issues they may have a negative impact during Construction and/or commissioning execution
- Identify start-up and running spares for M & P installations. Identify critical spares and lead time for delivery
- Ensure spares for the commissioning execution phase are on site ahead of schedule
- Support the development of a comprehensive M & P Witness/Hold program
- Review detailed test procedures and ensure safety is integrated into the procedure
- Work closely with each discipline ensure an overall integrated test plan is developed
- Ensure a high standard of discipline support is provided across the project consistently
- Review and sign-off contractor dossiers. Perform detailed M&P subsystem walk-downs, identify and log additional deficiencies and validate existing construction deficiencies
- Manage and schedule contractor work-faces and ensure continual compliance with scopes and specifications
- Support the Turnover & Handover processes, CM to completions
- Validate M & P installations are in compliance with project design, specifications and applicable codes
- Ensure M & P field installations are in accordance with vendor specifications where applicable
- Validate M & P equipment preservation at the time of subsystem turnover
- Actively participate in construction's integrity testing program in accordance with the project's "Witness / Hold" program
- Assist in the identification, documentation and communication of the organization's deliverables and dependencies across the project
- Clearly identify cross-project interfaces

Skills / Qualifications

- 10+ years' project experience in mining or heavy industrial projects
- Prior construction experience in the Mechanical discipline
- **Must** have prior experience with ball and vertical mill installations
- Superior knowledge of the project's construction QSA and HSSE processes
- Superior knowledge of testing and compliance standards, vendor or other
- Previous experience working on large scale industrial projects
- Authorization to lawfully work in Canada without sponsorship from Canada is required
