

Project Engineer

Wood has an opportunity for a **Project Engineer** to work on our Project Construction site near Gogama, ON with an international team during the construction phase of a Gold Mining Project. This role will be responsible for providing engineering and construction support on major EPC/EPCM projects.

Key Responsibilities

- Assist the Area Project Manager with the management of EPCM performance specific to all activities planned for a project area by:
 - Coordinating the execution of engineering, contracts and procurement, construction and/or project controls activities for the area or a sub-area(s)
 - Ensuring that all required data and information for the area or a sub-area(s) is made available to the project team
 - Defining the scopes of construction, services and procurement contracts for the area or a sub-area(s)
 - Compiling construction contract packages and/or site services contract packages, if necessary
 - Participating in the selection of suppliers and contractors
 - Supporting the preparation and maintenance of the project schedule for the area or a sub-area(s)
 - Supporting the assessment of engineering, procurement and/or construction progress for the area or a sub-area(s) within the overall project schedule and identifying mitigations should actual and/or forecast schedule performance deviate from planned
 - Coordinating the preparation of periodic cost forecasts for the area or a sub-area(s) or for a

- specific contract
- Identifying mitigations should actual and/or forecast costs deviate from planned
 - Participating in and coordinating the management of change process for the area or a sub-area(s) by informing the necessary parties and preparing the necessary change management documentation
 - Coordinating with and supporting home office for design changes
 - Participating in quality assurance audits
 - Providing input to the identification of risks and supporting the management of risks for an area or sub-area(s)

Skills / Qualifications

- Minimum of 10 years engineering or operations experience focusing on heavy industrial projects including at least 2 years in a project engineering role
- Professional Engineering License (P. Eng) in the Province of Ontario or eligibility to register with the PEO will be an advantage
- Ability to work independently and in a team environment
- Ability to work with people at all levels
- Effective organizational skills and the ability to multi-task
- Strong track record of successful project completion
- Experience in Mineral Mining projects will be an advantage
- The role will largely be site-based. Given this, applicants need to be familiar with standard camp accommodation and rules
- Authorization to lawfully work in Canada without sponsorship from Wood is required
